

An aerial photograph of a construction site. A large yellow excavator is positioned on a pile of sand and debris. To the right, there is a large, multi-story building with a tiled roof and solar panels. The ground is covered in sand and rubble. In the background, there are trees and other buildings. The overall scene suggests a major construction or demolition project.

About us

Ground Cleared. Future Unleashed.

With a systematic approach focused on safety, efficiency and environmental responsibility, All Cleared is redefining what modern demolition looks like. From strict site protocols to smart material separation and high recycling rates, our team delivers safer, cleaner outcomes without compromising on standards.

Hunter Jonassen
General Manager

Specialising In

Residential and Commercial Demolition

Standards, Safety and Sustainability.

All Cleared takes the guesswork out of demolition, replacing it with process-driven workflows, full transparency, and projects that run like clockwork. Every detail is handled from initial permits down to the final sign-off. We don't just show up and knock down walls. Our team plans ahead, communicates clearly, and delivers sharp, site-safe results without the setbacks.

Focusing on projects across Brisbane and the Gold Coast, the All Cleared team specialises in residential demolition, partial demolition and asbestos removal.

48 YEARS OF
COMBINED
EXPERIENCE.

Our Capabilities

Our Services

Complete Demolition

Get your dream home with the All Cleared Demolition approach. Our experts will safely and responsibly recycle and remove all materials from your property, adhering to our sustainability practices. No job is too big or too small for our expert team.

Earthmoving

Our experienced team is fully equipped with the machinery and expertise to undertake earthworks for projects of any scale. Whether it's site preparation, excavation or clearing, we approach every job with the same focus on safety, efficiency and precision.

Stay Updated, Without The Hassle

Real-time Project Updates

All Cleared uses a structured project platform to manage progress and documentation. This system standardises workflow, records site activity, and keeps you updated in real-time.

Automated Updates

Site progress shared daily through regular updates.

Organised Documentation

Quotes and compliance records tracked internally for accurate handovers.

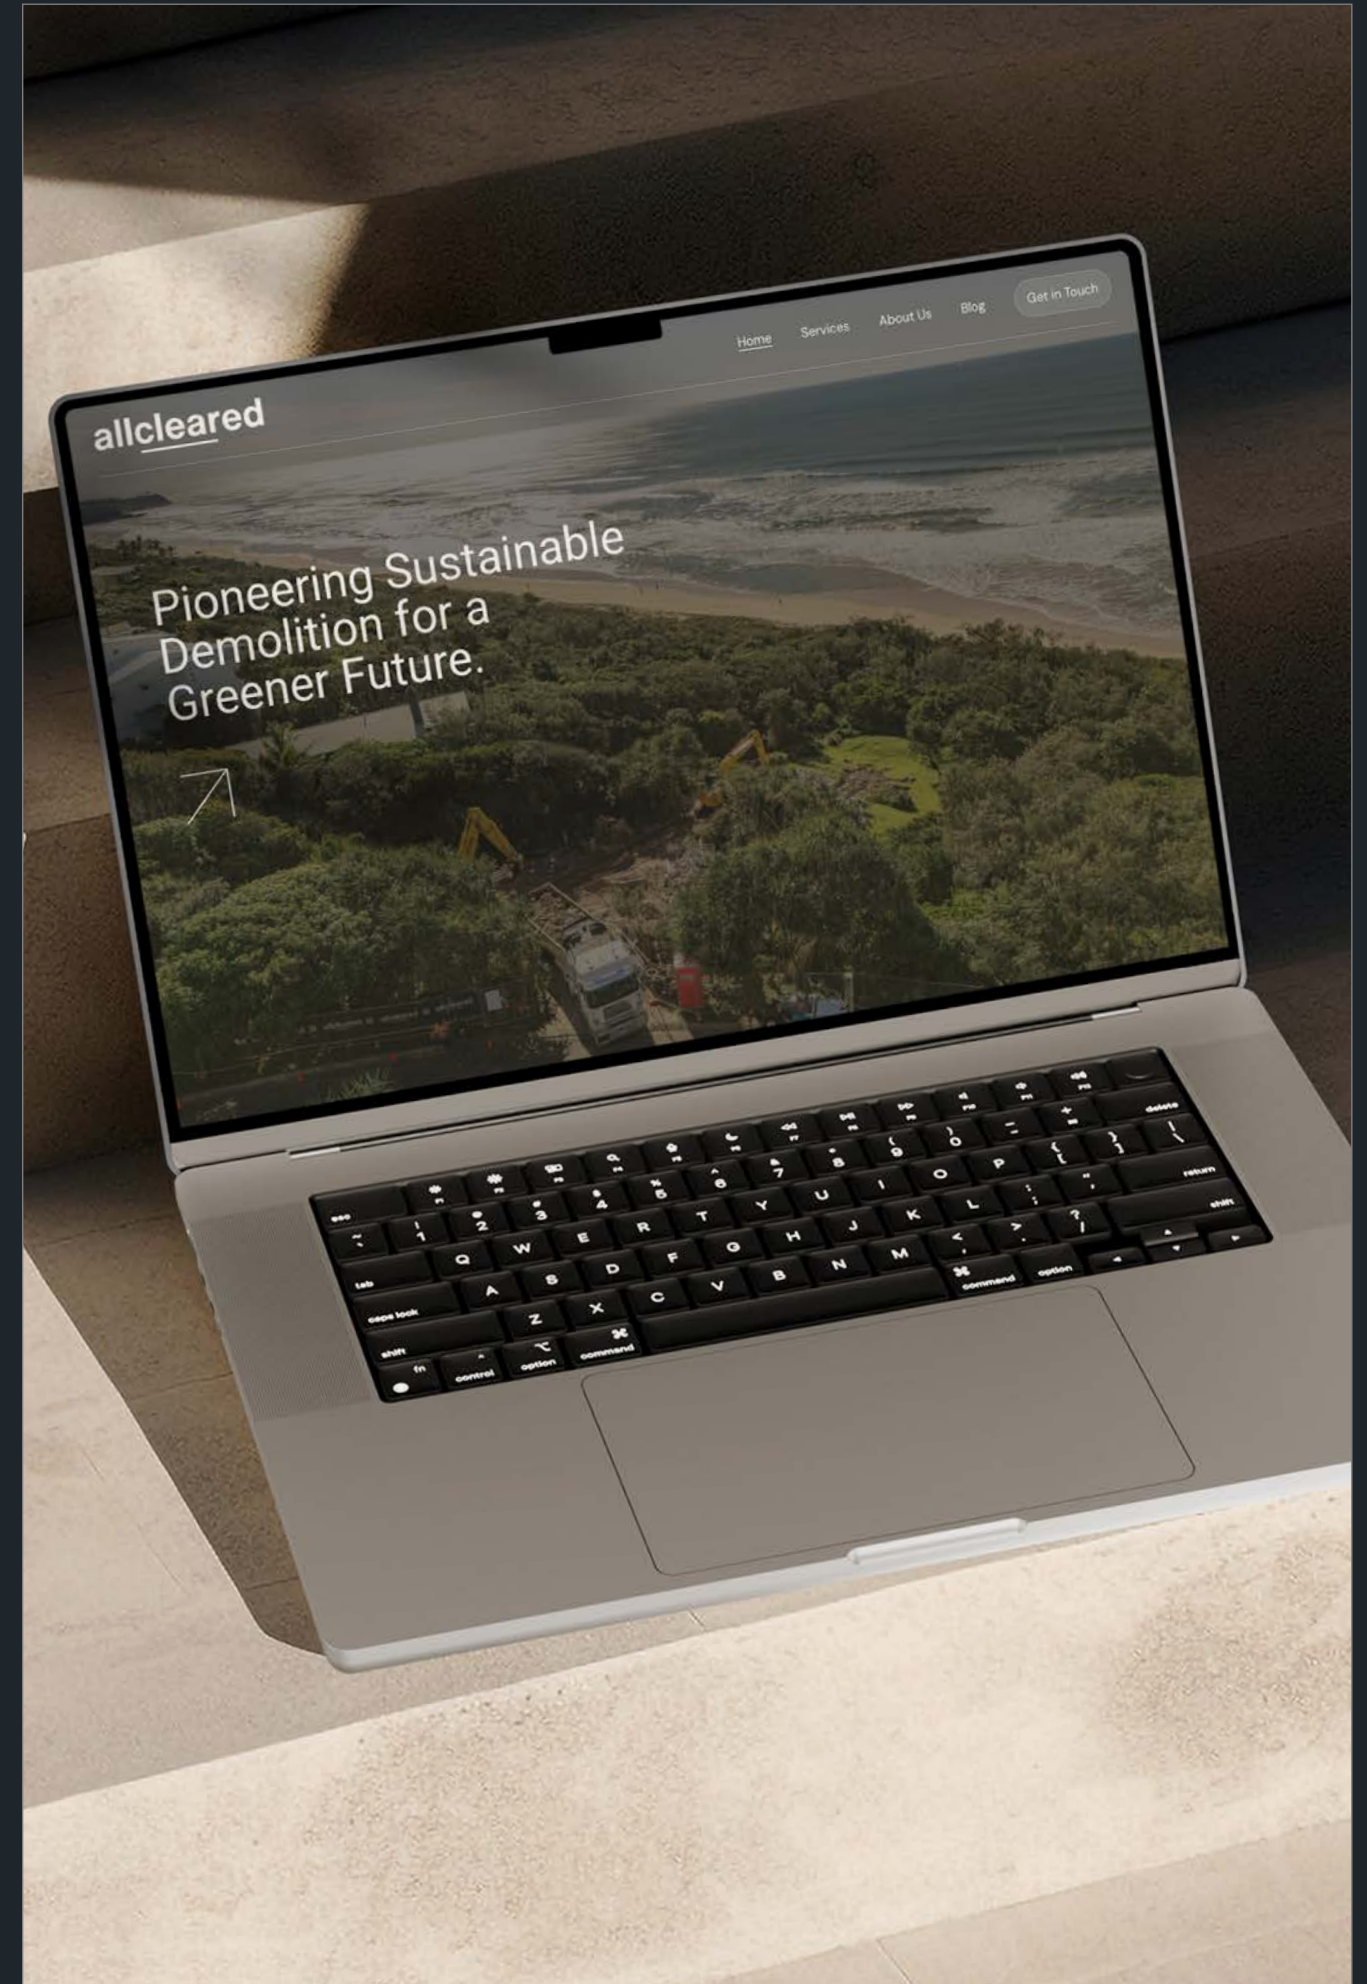

Process-Driven Delivery

A structured workflow that systemises projects and reduces risk.

Connected Wherever You Are

Receive updates and documentation digitally, no need to be onsite.
